DEVELOPER PROFILE

I never thought that I would find a career that I was truly passionate about, until I stumbled across the world of software development. It all started with creating a simple 'Hello World'. From that moment on, I have been hooked.

Below you will find projects I have completed that showcase my skills and general background in developing software.

EDUCATION

Bachelors in Business Administration

Concentration in Project Management and Business Analysis

Towson University,
Towson, Maryland

QUICK BREW

An interactive and fully responsive website built with React. Provides the user with details about Quick Brew coffee shop. This includes reviews, daily events, and an interactive menu. I also created a shop with Commerce.js and connected it to Stripe for the ability to accept payments.

FITMAX

A React application used to track the cardio activities of the user. These activities can be compared with the goals that the user sets. The users data is stored in a database created with PostgreSQL and connected to a server that was made with Node and Express.

SOFTWARE

- . Proficient in HTML and CSS
- . In depth knowledge of Javascript and React
- . Experience in using Sass, Node, Express, and PostgreSQL

CRYPTO

An interactive landing page using HTML, Sass, and vanilla JavaScript. It is connected to two APIs. This project gave me more experience working with the DOM and using API's.

NEWS

A news application built with React and TypeScript. It is connected to the Guardian API and provides the user with a variety of different news articles. It also includes a search bar to find specific articles.
